Moultrie, Georgia 31776

Dear Mr. Howes:

On May 24, 1995 while testing newly installed generation equipment, a 5KV fault occurred in the breaker room of our power plant. I was crouched in front of a 1200 amp breaker cubicle when the sudden flash fire surrounded me. Fortunately for me, my safety equipment did its job.

Your product protected me the way it was designed to. Even though the shirt was blacken from smoke and flash, it washed up and looked like new.

Sincerely,

Allen Fischer
